TECHNICAL SKILLS

- **Proficient:** Typescript, JavaScript, ReactJS, NextJS, NodeJS, Express, Dart, Flutter, Python, Git, C++, Linux, SQL, PostgreSQL, MySQL, Firebase, HTML5, CSS3, SASS and Tailwind CSS
- **Exposure:** Java, AWS, MongoDB, Flask, CI/CD, Bash, Digital Ocean

WORK EXPERIENCE

The Difference App LLC | Software Engineer | New York   **June 2022 – Present**
- Participated in the CUNY Career Launch program and was selected as the company's first choice for an internship out of 3400+ applicants and was offered a return offer at the end of the internship.
- Designed microservices routes for a full-stack CRUD Application from scratch with JavaScript, ReactJS, NodeJS, Express, and MySQL. Visualized data for customers with graphs using Flutter, increasing user retention by 20%.
- Managed a team of 4+ engineers and led code source control using GitHub and Git to build an Administrator Console to facilitate customer management by employees, increasing the response time by 80%.

To Be Determined, INC | Software Engineer | Remote   **September 2022 – Present**
- Created a full-stack NFT User Interface using NextJS, JavaScript, Typescript, Firebase, React, Storybook, Tailwind CSS, SASS, and Adobe XD with a team of 10+ engineers.
- Worked closely with designers to translate wireframes into components and pages in the full-stack application.
- Reviewed, refactored, and fixed bugs in daily pair programming sessions with peers, and checked pull requests.

Plivo | Software Engineering Mock Internship   **August 2022 – September 2022**
- Engaged a team of 5+ engineers and a designer to build a system for email, SMS, and instant messaging in-app, as well as triaging, facilitating, and responding to customer requests.
- Engineered Google Cloud Functions which was listened for request 99% of the time to receive and send detailed and HTML formatted emails to users and administrators when new tickets are opened.
- Finished first place against 11 teams who presented their final product to the Product Marketing Manager of Plivo

The Headstarter | Software Engineer Fellow | New York   **May 2022 – September 2022**
- Built 8 full-stack applications using MVC design patterns with NextJS, ReactJS, NodeJS, Firebase, GCP Functions.
- Selected out of 700+ candidates (14% of applicants were accepted)
- Trained by engineers from Amazon, Bloomberg, and Capital One on Agile, CI/CD, Git, and microservice patterns.

New York Jobs CEO Council and CUNY | Software Engineer Apprenticeship | Remote   **June 2022 – August 2022**
- Utilized HTML, CSS, JavaScript, Bootstrap, Python, SQL/PostgreSQL, Cloud Computing to build and launch a full-stack application.
- Engaged in a demanding 5-week coding bootcamp where I spent 100+ hours learning various technologies.
- Developed a portfolio and gained hands-on experience by constructing a custom web application and database.

EDUCATION

Bachelor of Science in Computer Science | *CUNY York College*   **Graduated June 2022**
- Minor in Communication Technology | Spring 2022 Dean's List

PROJECT WORK

Gotlisted | NextJS, TypeScript, Tailwind, SASS, Firebase | Deploy URL   **Fall 2022**
- Suite of tools that artists can use to cultivate their communities and generate revenue off their passion.
- Built a set of actions based on the status of the user registration in the application using Next-Auth.

Link | NextJS, TypeScript, Tailwind, Zapier, Google Cloud Functions | Code URL   **Summer 2022**
- Developed a solution for businesses to scale and modernize their way of communicating with customers.
- Communicated with SendGrid and sent emails based on user and administrator interactions.

Contuso | React, Tailwind, GCP, Stripe | Code URL   **Spring 2022**
- Created an ecommerce auto parts website with secure payment using Stripe API.
- Wrapped Firebase backend logic in Cloud Functions to listen for updates in Firebase and Stripe database.

AWARDS AND CERTIFICATIONS

SWE: Track in Web Development | *QCC Continuing Education and Workforce Development*   **Summer 2022**
